Mapping Tool Reference Condition Tables and related material are also available.

*The FRCC Software Application Database contains Refresh, LFNAT, Rapid Assessment and Guidebook BpS Models. Open Windows Explorer to the folder in which the software is installed (default is: C:\FRCCStdLndscpWksht), rename the old frcc.mdb to "frcc_old.mdb" and paste the new frcc.mdb into the folder.

The Multi-Scale Resource Integration Tool (MRIT) is now known as the Landscape Assessment Tool or LAT. A version of the Multi-Scale Resource Integration Tool (MRIT) or LAT is now available for use with ArcMap 9.2 and is available on the Beta User Downloads page. To obtain a version of MRIT (LAT) suitable for use with ArcMap 9.0 or 9.1 go to the Archives page.

If you have difficulties installing any of the tools please contact the helpdesk helpdesk@niftt.gov

To download older versions of the tools and documents, go to the Archives page.

If you would like to download beta test versions of new tools under development, go to the Beta User Downloads page.
