MINIMUM

RECOMMENDED

Windows operating system

2000/XP

2000/XP

Memory

1GB

At least 1.5GB

Processor: P4 or equivalent

1.0GHz

At least 2.0GHz

Free hard drive space

5GB

At least 10GB

Display resolution

800 x 600

At least 1280 x 1024

Mouse or Pointer

Required

Required

In addition, your computer should have a CD-ROM drive and at least one USB 2.0 port.

Computer Software

NIFTT tool users are required to have ArcGIS version 9.0 or higher loaded on their computers, along with the Spatial Analyst extension. Tool users must also have Microsoft Excel loaded for data access. For the tools to run properly, Crystal Reports should already be installed on your computer. (To verify that it is installed, select Start > Settings > Control Panel > Add/Remove Programs. Scroll down the alphabetical list of programs and you should see Crystal Reports for ESRI). The current tools will work only on ArcMap 9.0 or 9.1. ArcMap 9.2 version tools will be available in early 2008. Please check back to download Version 9.2 compatible tools. as they become available.

User Requirements

NIFTT tool users should have a working knowledge of ArcGIS. At a minimum, this should include prior attendance at an ESRI Authorized Introduction to ArcGIS I course or equivalent experience.
