

FREE SPEECH IS NEVER AS DANGEROUS AS THOSE WHO TRY TO SILENCE IT.

Shhh. Don't say the wrong thing. Agree, or else. Conform, or be banished. Throughout history, silencing dissenters has been the key to dismantling democracy. If you agree with the trending opinions, it may not seem so bad to censor minority opinions. But power shifts. The majority changes. Before you know it, you're the one being silenced. The American experiment depends on each of us having a voice. That's why it's so important to protect everyone's free speech — whether we agree with it or not.
